Dear Sir or Madam

Directive 2002/95/EC – The RoHS Regulations

The Restriction of the use of certain Hazardous Substances in electrical and electronic equipment regulations 2005 (the "RoHS Regulations") will shortly be passed into UK legislation. (The Regulations become enforceable from 1 July 2006.)

The European Union RoHS Directive restricts the use of Lead, Mercury, Cadmium, Hexavalent Chromium, Polybrominated Biphenyls (PBB) or Polybrominated Diphenylethers (PBDE) in new electrical and electronic equipment put on the market in the European Union after 1 July 2006.

The RoHS Directive applies to eight categories of electrical and electronic equipment but specifically excludes products in Category 9 (Monitoring and Control Instruments), under which Carbolite products fall.

However, Barloworld Scientific recognises the importance of eliminating these harmful substances in terms of environmental benefit and have embarked upon a voluntary programme, together with our suppliers, to remove these substances where possible from the Carbolite product lines.

For more information, or in case of a query, please contact the Technical/Development Department at the address or telephone number given above.

Yours faithfully

A handwritten signature in blue ink, appearing to read "Tony Townsend".

Tony Townsend
QA and Service Manager
